

ITALIAN DIALECT MEETING 2015 AND CIDSM X

LEIDEN UNIVERSITY CENTRE FOR LINGUISTICS

22 JUNE 2015, KLEIN AUDITORIUM, ACADEMIEGEBOUW

8:15-9:00 REGISTRATION

9:00-9:15 OPENING

9:15-10:00 KEYNOTE SPEAKER

Michele Loporcaro, University of Zurich

T.B.A.

10:00-10:30 Patrizia Cordin, University of Trento

Origine e uso di una forma interrogativa in area settentrionale

10:30- 11:00 COFFEE BREAK

CIDSM X

11:00-11:30 Anna Cardinaletti and Giuliana Giusti, University Ca' Foscari of Venice

Indefinite determiners in Italo-Romance: An insight from a lesser studied central Italian dialect

11:30-12:00 Silvio Cruschina, University of Vienna

The go for construction in Sicilian

12:00-12:30 Lori Repetti and Francisco Ordoñez, Stony Brook University

Negative Imperatives in the Romance Language of Italy

12:30- 14:30 LUNCH BREAK

14:30-15:00 Ermengildo Bidese and Alessandra Tomaselli, University of Trento and University of Verona

Different strategies to circumvent the 'that-trace effect'

15:00-15:30 Delia Bentley, University of Manchester

Agreement impoverishment in Gallo-Italian and the logical structure of VS constructions

15:30-16:15 KEYNOTE SPEAKER

Ian Roberts, University of Cambridge

T.B.A

16:15-16:40 COFFEE BREAK

16:40-17:10 Giancarlo Schirru, University of Cassino and Southern Lazio

'Avita fatta'. Forme non etimologiche dell'ausiliare 'avere' nei dialetti meridionali

17:10-17:40 Patrizia Del Puente, University of Basilicata

Il dialetto dei giovani: Indagine sociolinguistica nell'area veneta

**Mechanisms for encoding compositional telicity:
the function and distribution of dative clitic pronouns in Northern Calabrian.**

DOMENICA ROMAGNO
University of Pisa
Department of Philology, Literature and Linguistics
Linguistics Branch
36 S.Maria St., 56126 PISA, ITALY

In the present paper, we examine the function and distribution of specific constructions including a dative clitic pronoun in both the dialect varieties spoken in *Rogliano* and *Santo Stefano di Rogliano* (*Cosenza*, Italy), and in the regional variety spoken in *Cosenza*. We show how the presence vs. absence of the dative clitic constitutes a strategy for encoding the presence vs. absence of telicity in the event representations denoted by verbs such as “to eat” and “to drink”. Telicity distinguishes events that necessarily entail a specified endpoint (e.g., “to murder”, “to arrive”) from event with no temporal and spatial delimitation or final state (e.g., “to look at”, “to walk”: Vendler, 1967; Dowty, 1979; Bertinetto 1986; Tenny, 1994; Van Valin & La Polla, 1997, among many others). Telicity may be either inherent in the verb lexeme or morphosyntactically encoded, that is, expressed at the verb phrase level and, therefore, «compositionally» determined by the combination of the verb lexeme and its object and/or other elements in the verb phrase that are relevant to the delimitation of the denoted event, such as, for instance, directional prepositional phrases and particles. With two-argument verbs like “to eat”, the degree of telicity is related to the degree of object individuation; only an object expressed as a specified quantity can measure out the event denoted by the verb: “he ate two apples (in five minutes)” = telic vs. “he ate only red apples (for years)” = atelic. With one-argument verbs such as “to run”, the degree of telicity is related to the presence vs. absence of a directional prepositional phrase: “I run to school (in ten minutes)” = telic vs. “I run along the river (for an hour)” = atelic (Verkuyl, 1972, 1993; Dowty, 1991; Tenny 1994; Lazard, 1984; Slabakova, 2001; Alexiadou et al., 2004; Chierchia, 2010; Rothstein, 2010). In the dialect varieties spoken in *Rogliano* and *Santo Stefano di Rogliano*, the presence vs. absence of the dative clitic pronoun in combination with two-argument verbs systematically encodes the distinction between telic and atelic representation of the event. In the alternation [e 'mmɔ̄ 'kkə t̪e 'mndʒ̪i] vs. [e 'mmɔ̄ 'kkə 'mndʒ̪i], both sentences mean “and now what do you eat?”; but only the former refers to a telic event and, therefore, occurs in contexts that require the event of eating up or devouring, whereas the latter is used to ask “in this period, what kind of diet are you following?”, thus showing that the expression ['kkə 'mndʒ̪i] refers to a state or condition of the subject and not to a delimited event. Significantly also, only the sentence without the dative clitic admits of progressive interpretation: it is well known, indeed, that the imperfective aspect suspends the telic value of a predicate (Bertinetto, 1986; Bertinetto et al., 1995; Bonomi, 1997). Similarly, only constructions without the

clitic pronoun are allowed in contexts such as “which are the American eating habits/which is the American typical food?”: [ar- a'mεrika 'kkə 'mmandʒənu] vs. *[ar- a'mεrika 'kkə ssə 'mandʒənu] “in the US, what do they eat?”. The same pattern of functional distribution of the dative clitic pronoun as a strategy for encoding compositional telicity of two-argument verbs such as “to eat”, “to drink”, “to read”, etc. equally applies to both the dialect varieties mentioned above and the regional variety spoken in *Cosenza*. Notably, we did not find variations related to age, gender and number of years of education of the interviewed speakers. Mechanisms for encoding telicity, as well as other properties at the interface between morphosyntax and semantics, in Italian dialects, are almost entirely unknown. Significantly, the results of the study reported here parallel the results of a recent study on Salentino dialect (Fanciullo, 2014), which provided the first hint of this research line.
