Conference Aims and Subject Areas

The main title of the MIC 2019 is *Managing Geostrategic Issues*. The rise of the BRICS countries, as well as the rise of many other developing countries, creates new opportunities and challenges for the international community. New opportunities emerge for the new generation of entrepreneurs and innovators from both developed and developing parts of the world. New challenges relate to the issues of energy and climate change, international trade and finance, the future role of international institutions, such as the WTO. New challenges also relate to the rise of populism in many parts of the world as well as to the continuous rise of inequality within many developed and developing countries.

The aim of the conference is to address various aspects of managing geostrategic issues, with special focus on the following thematic areas:

- management,
- economics,
- finance,
- tourism,
- energy and climate,
- digitalization and the workplace,
- international institutions and development,
- trade.

Doctoral Students’ Workshop:
Message-Driven Writing

Part 1: Thursday, 30 May 2019 • 16.30–18.00 • 2D
Part 2: Friday, 31 May 2019 • 12.00–13.30 • 2D

Workshop Facilitators
Matija Vodopivec, University of Primorska, Slovenia
Dr. Štefan Bojnec, University of Primorska, Slovenia

Doctoral Students’ Workshop provides an opportunity for doctoral students, young researchers and postdocs to gain new knowledge and skills on academic writing for publishing scientific papers in international journals.

The workshop will be divided in two parts. Dr. Štefan Bojnec will shortly present how to publish in economic and business journals in the first part. In the continuation of the workshop, moderated by Matija Vodopivec, the message-driven writing technique will be discussed with participants – a technique where the main message dictates the structure of the text and its content. This technique is in fact commonly used by experienced researchers, and it will be presented in an accessible, clear and useful manner. Since writing is a creative process, it is always demanding and often frustrating; the workshop will show how this process can be less stressful and more productive.

The Doctoral Students’ Workshop will cover the following topics:

- How to publish in economic and business journals.
- Planning the content: how to formulate the main message, constructing thematic and extended outlines, and the content of individual sections.
- Drafting and editing: writing the first draft, revising, editing, and tips on writing paragraphs.
- Publishing: what editors seek, selecting journals, and the process of revising.
